with cover

Without cover

Large

with cover

Without cover

Built-in round tube

The finished product has a firm structure

Double loop pulley

High mechanical strength, wear resistance and more durable

large capacity

Smooth texture, difficult processing, high technological requirements

RATTAN CRAFT

Rattan weaving generally goes through more than a dozen processes such as large rattan (cutting the knots on the rattan), picking rattan, washing rattan, drying rattan, twisting rattan, pulling rattan (planing rattan), cutting rattan, bleaching, dyeing, weaving, and painting. After repeated grinding and patience, the craftsman's hard work is not easy between the vertical and horizontal warp and weft.
